To Whom it may concern:

This response is in reference to your letter dated 09-26-2012 seeking additional information received by the committee. Regarding your request, a total of eight (8) transactions which were input for the Primary were due to a technological problem with the software system used by the Committee. These errors since have been corrected and the Committee has been assured by the vendor the errors will not occur again.

Three (3) contributions previously designated for the Primary are in the process of being corrected. As the FEC is aware per communications, the delay in entering these contributions was due to an emergency illness of the individual responsible for entering the information into the database. The Committee has sent letters to begin the process of re-designating these three (3) contributions for the General Election and awaits responses.

On behalf of the Committee, if I can provide additional clarification please do not hesitate to contact me.

Sincerely,

Lenora Sue Gompert
